

Project Overview

FurEver Care is a responsive pet-care website that provides pet-care information, products, veterinary resources and animal shelter information through an interactive and user-friendly interface.

PROJECT TITLE: FUREVER CARE

Main Features

- Pet Owner, Veterinarian & Animal Shelter portals
- Pet Profile
- Pet Care Guides
- Pet Products with search and categories
- Vet & Emergency information
- Feedback & Contact
- Adoption and shelter information
- Responsive design and multimedia content

Technologies Used

HTML5, CSS3, JavaScript, JSON, Bootstrap, Lottie and other required libraries/resources.

Setup & Usage

- Extract the project ZIP file.
- Open the project in Visual Studio Code.
- Run the main index.html using Live Server.
- Select the required user role and navigate through the website.

Assumptions

- The website is a front-end based project.
- Product and other predefined information uses local/sample data.
- Forms and purchasing features are provided for demonstration purposes.
- No server-side database is used.

AI & External Resources

- Selected images, videos, audio and visual assets were created or enhanced using AI tools and external libraries/resources used in the project.
- AI Tools Used: [Nano banana, google vids, Gemeni, Eleven Labs]
